

2 BARREL CARBURETOR ADAPTERS

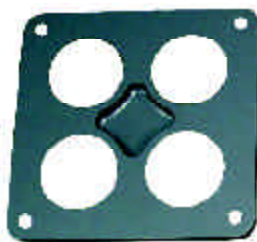

PART NO.	DESCRIPTION
7211	1.100" thick combination spacer adapter designed for open plenum intake manifolds. The spacer directs fuel flow to the rear of the intake manifold to equalize fuel distribution resulting in a gain of 4-6 horsepower over conventional adapters. Dual plane intakes use 7216 or 7219.
7214	same as 7211 except the spacer is 1" thick to conform to certain track rules.
7219	A 1.500" thick combination spacer adapter. This spacer features a special radius where the bores open into the intake manifold. This spacer will work with both open plenum and dual plane intake manifolds.
7216	same as 7219 except the spacer is 1" thick to conform to certain track rules.

THE "ORIGINAL MERGE SPACER"

Mike Laws, with Motorsports Product Design & Development (MPD), designed these (2) unique "Merge" carburetor spacers. Unlike other "Merge" carburetor spacers the cone portion of this spacer extends into the manifold approximately 2.000". This helps prevent fuel puddle at the bottom of the intake manifold. This is an easy bolt on horsepower gain.

PART NO.	DESCRIPTION
72511-1.688	1.000" for 750-830CFM carburetors.
72511-1.750	1.000" for 850CFM carburetors.
72512-1.688	2.000" for 750-830CFM carburetors.
72512-1.750	2.000" for 850CFM carburetors.

4500 DOMINATOR SPACER

BLP offers a new design lightweight 4-hole spacer for the 4500 series carburetor. It features a special radius and taper into the plenum area. Dyno test results have proven this feature to be better than the straight hole design.

PART NO.	DESCRIPTION
72181-2.000	.500" thick for 2.000 throttle bore.
72181-2.125	.500" thick for 1.125 throttle bore.
72181-2.250	.500" thick for 2.250 throttle bore.
72182-2.000	1.00" thick for 2.000 throttle bore.
72182-2.125	1.00" thick for 2.125 throttle bore.
72182-2.250	1.00" thick for 2.250 throttle bore.

BLANK CARB SPACERS

These spacers are completely finished except they have been left blank so the user can profile them for their application.

PART NO.	DESCRIPTION
7233	1.000" Blank spacer
7232	2.000" Blank spacer

AIR CLEANER SEAL AND CARBURETOR COVER

The BLP air cleaner seal is constructed from a heavy-duty polymer material .150" thick and .300" wide. The seal incorporates a special sealing bead and is just the right durometer in hardness to insure the proper air cleaner seal.

The carburetor cover is made from a heavy duty ABS plastic material. When used with a 4523, this cover will provide protection from debris and water.

PART NO.	DESCRIPTION
4523	Air Cleaner Seal that fits all 5" air horn carburetors (standard Holley®).
4525	5" Carburetor Cover.
45251	5" Carburetor Cover with screen.

CARBURETOR STUD KIT

Kit includes (4) studs, (4) 5/16" flange nuts and (4) AN washers.

PART NO.	DESCRIPTION
6236	1.50" long
6238	2.50" long
6239	3.00" long
6236-100	Studs only (100)
6238-100	Studs only (100)
6239-100	Studs only (100)
